## **Siskiyou Appoints eQuestus as U.S. Western Regional Representative**

2/27/17 – Siskiyou Corporation has appointed eQuestus Corp. as their exclusive sales representative for the western United States (AZ, CO, ID, MT, NV, NM, OR, UT, WA, WY, CA, NV and UT). eQuestus will be responsible for sales of the entire Siskiyou product line, including micromanipulators, microscope sample positioners, motion control systems and modular opto-mechanical mounts and positioners for life science and photonics researchers and OEMs.

“We’re selling a technically sophisticated product, and it’s essential that our sales representatives be able to dialogue in diverse applications about the exact use and benefits of our equipment,” notes Robert Hodge, Siskiyou President. “eQuestus was founded by Carmen Pistillo, who holds a degree in Chemical Engineering and has worked in R&D in industry. The rest of his staff have similarly strong technical backgrounds. This will enable them to engage in the type of consultative selling and relationship building that have been keys to Siskiyou’s success over the past 45 years.”

*Siskiyou Corporation (Grants Pass, OR) provides a diverse range of micromanipulators, microscope sample positioners, motion control systems and modular opto-mechanical mounts and positioners to life science and photonics researchers and OEMs. The goal of the company is simple – to offer the highest quality product at an economical price, and to support customers with superior service. Founded in 1972, Siskiyou is a vertically integrated company, performing all design, manufacturing, anodizing, and assembly in-house.*
